To learn more about the UO’s impact, contact us at gcr@uoregon.edu or visit gcr.uoregon.edu/oregon-

* UO’s program that ensures academically-qualified Pell Grant-eligible Oregonians will have their tuition and fees paid through a combination of federal, state and university funds.

** The Oregon Opportunity Grant (OOG) is Oregon’s largest state-funded, need-based grant program for college students.

The UO is an equal-opportunity, affirmative-action institution committed to cultural diversity and compliance with the Americans with Disabilities Act. This publication will be made available in accessible formats upon request.

Notes:
- Federal 67%: $25.1M
- UO 23%: $8.4M
- State 10%: $3.9M
- In 2021–22 unmet financial aid need for all UO resident students was $62.9 million

In spring 2022, the University of Oregon qualified for an “emerging Hispanic Serving Institution” federal designation. The status is given to institutions with at least 15 percent Hispanic enrollment by the US Department of Education. The status allows an institution to become eligible for various forms of federal support to assist the UO in attaining full status.

**Serving a Diverse Student Community**

In spring 2022, the University of Oregon qualified for an “emerging Hispanic Serving Institution” federal designation. The status is given to institutions with at least 15 percent Hispanic enrollment by the US Department of Education. The status allows an institution to become eligible for various forms of federal support to assist the UO in attaining full status.

**Meeting Industry Workforce Needs**

Every year the Knight Campus Graduate Internship Program (KCGIP) enrolls 80-100 students pursuing master’s degrees in focus areas of semiconductors, optics, polymers, sensors and genomics. Students are placed in paid internships at companies in Oregon and beyond. 90% of internship graduates are employed within their field in three months, and companies benefit from skilled scientists with real-world experience. The Oregon Pathways to Industrial Research Careers (OPIRC) is a new NSF grant-funded program that will support 64 Pell grant-eligible students as they move through community college and the UO to high-wage science and engineering careers. Students start at Central Oregon, Lane, and Umpqua CCs and transfer to UO to earn physics, chemistry, or biochemistry degrees, and then pursue an industry-focused master’s degree through the KCGIP.

**Increasing Economic Development Capacity in Rural Communities**

Resource Assistance for Rural Environments (RARE) is a founding AmeriCorps program established in 1994 and operated by UO's Institute for Policy Research and Engagement. RARE participants spend an entire year assisting agencies and NGOs in the development and implementation of plans for improving rural economic conditions while gaining community building and leadership skills. In CD 4 the longest partnerships with RARE are with the City of Veneta (14 years), the Umpqua Community Development Corporation (8 years), the City of Creswell (7 years), the City of Florence (7 years), and the City of Reedsport (7 years). A current RARE placement in Lincoln County focuses on the ART Toledo project that is promoting robust visitor engagement for the City of Toledo.

**Promoting Resiliency Through Multi-Hazard Early Warning**

The Oregon Hazards Lab, in collaboration the U.S. Geological Survey, three other west coast universities, and other public and private partners, operates ShakeAlert, an onshore earthquake early warning system that provides seconds to minutes of warning of impending ground shaking. The warning from hundreds of sensors placed throughout Oregon, including 66 sensors in CD 4, allow individuals to carry out pre-determined action for safety, and, through automation, industry, utilities and transportation sectors are able to power down or protect critical operations.
