EMPOWERING OREGON STUDENTS

PathwayOregon is the University of Oregon's promise to academically qualified Oregonians with significant financial need: no tuition, no fees, just opportunity.

By combining financial aid with academic and advising support, PathwayOregon removes barriers to success, helping more Oregon students navigate college, graduate on time, and build a better future for themselves and their communities.

FINANCIAL AID TO STUDENTS IN HD 57

- 35 Institutional Awards to UO Students
- 27 PathwayOregon Students
- 25 Pell Grant Recipients
- 24 Oregon Opportunity Grant Recipients

Updated February 2025. Data sources: Student and employee headcounts, diversity, and payroll amounts utilize Fall 2024 data. UO employee numbers per district are based on employee's mailing address and may include student employees. Financial aid information, research amounts, and degree award counts utilize data from the 2023-24 academic year. Data sourced from UO Institutional Research; UO Vice President of Research & Innovation; UO Student Services and Enrollment Management; UO Student Life Office of Assessment and Research, 2022-23 First Destination Survey; Post Graduation Outcomes; Tim Duy, Economic Impact 2020-21 Update.

Early Literacy & Education

The UO's College of Education is a national leader in shaping futures. With tools used in over 29,000 schools, our research transforms classrooms across the country. The HEDCO Institute brings groundbreaking educational strategies to teachers, ensuring that Oregon's youngest learners—and learners across the nation—have the support they need to succeed from day one.

Youth Behavioral & Mental Health

The UO is addressing the youth mental health crisis head-on. At the Ballmer Institute and the Prevention Science Institute, we combine research with real-world applications to support young Oregonians. By embedding resources in schools and working directly with families, we're strengthening the state's mental health foundation, so every child has the support they need to thrive.

Community Service

Our commitment to Oregon's communities is woven into everything we do. Through the Sustainable City Year Program, the UO tackles community challenges with sustainable solutions, while the RARE Program brings expertise to rural areas to support economic development. From cities to small towns, the UO is a partner in creating resilient, thriving communities that prosper together.

Environmental Resilience

In a state defined by natural beauty, the UO is working to keep Oregon's landscapes—and its communities—resilient. The Oregon Hazards Lab powers ShakeAlert with 220 seismic monitoring stations and helps first responders track wildfires through a network of cameras statewide, while the Oregon Institute of Marine Biology works to study and preserve the state's coastal ecosystems. Through these efforts and many others, the UO is ensuring Oregon's environmental legacy endures.

The impact of the University of Oregon is all around you.

Since its founding in 1876, the UO has been at the forefront of innovation and discovery—its effects felt across all 36 Oregon counties and beyond.

Human Performance & Sport

The UO is redefining human performance to benefit health and community. As part of the Wu Tsai Human Performance Alliance, our research goes from molecular studies to practical applications, improving health and enhancing athletic excellence. The Bowerman Sports Science Center brings cutting-edge discoveries to the community, creating tools and techniques that drive wellness, resilience, and human potential.

Workforce Development

Oregon's workforce depends on UO graduates, ready to step into industries across the state. **According to the UO's 2022-23 First Destination Survey, 98% of 2023 graduates who responded 6-12 months after graduation reported being employed, pursuing further education, or engaged in service programs (e.g., Peace Corps).** With strong industry partnerships and skills-focused programs, we're ensuring Oregon has the talent it needs to compete and grow.

Accelerating Innovation & Scientific Impact

At the Knight Campus, innovation isn't just a goal—it's a way of life. Our researchers are turning science into real-world solutions, fueling Oregon's economy and helping local businesses thrive. With our Knight Campus Graduate Internship Program placing students directly into Oregon's industries and Launch Oregon empowering startups, we're building an ecosystem of innovation that benefits every corner of the state.

Collaboration

Collaboration is at the heart of the UO's impact. Partnering with OSU, OHSU, PSU, and local industries, we're combining expertise to tackle the state's biggest challenges. These joint efforts drive innovation and strengthen Oregon's economy. Together, we're creating opportunities that benefit every Oregonian, with a future that's brighter and more prosperous for all.
